

An Android Based enterprise smart-force CRM

www.sudesicloud.com

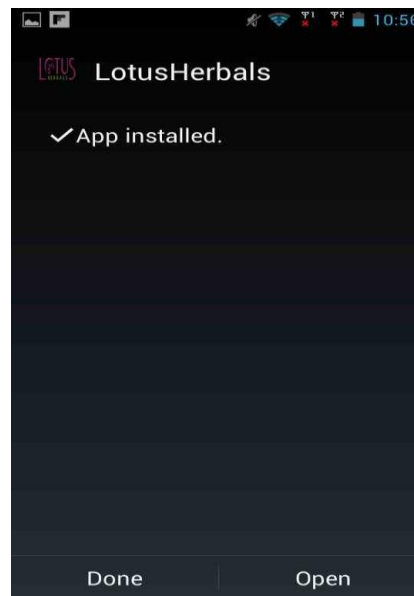

Installation & Uninstallation of APK

Click on downloaded file. You find new page click on install button.

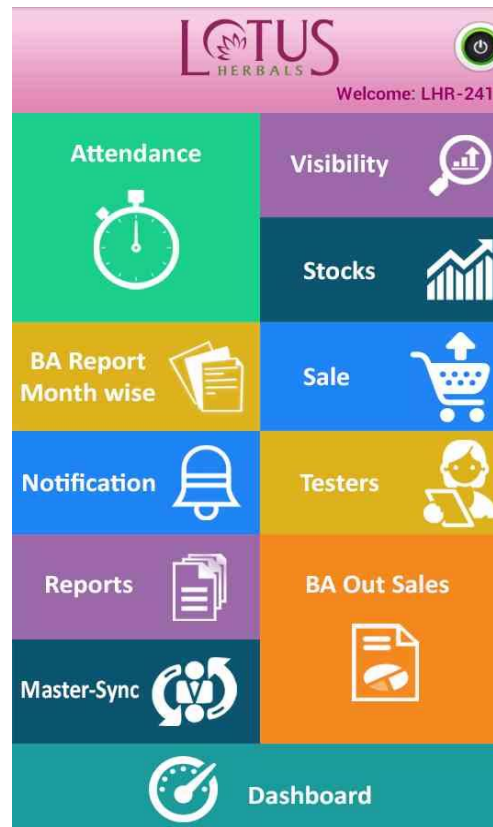

Application installed in your device. Then click on open or done.

- If you click on open application will open.
- If you click on done then go to the device menu and you find there lotus app.

Login to the application

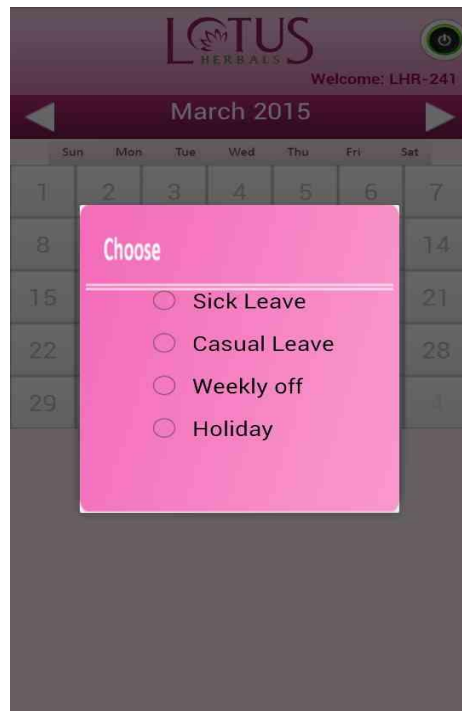

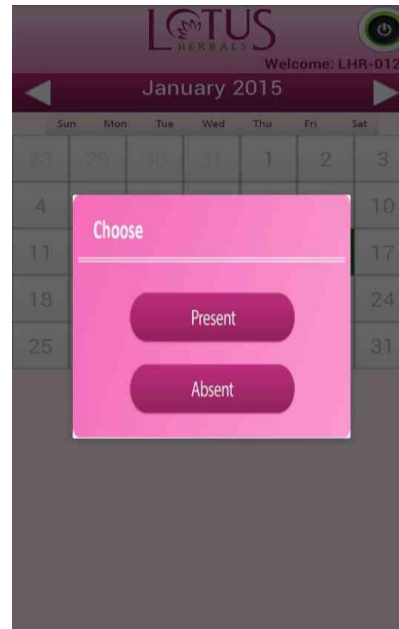

- Once launch the application the login window appears where the user needs to enter the user credentials given to them

(for example: user-id = LHR-123 and password = 'password'),

and after successful login user will be automatically redirected to home page.

Marking Attendance(Present/Absent):

- After Successful login attendance screen appears for marking attendance as Present/Absent. User needs to select current date only. Once the user marked as Present he will be redirected into home page, and if the user marked attendance as Absent user will automatically logout from the system, and user won't be able to enter into system. User has to select reason for absent like Sick leave, Casual leave, Weekly off or Holiday.

Master-Sync

- **Master Download** :Synchronise all the master data(eg. Product Master Should be Updated accordingly).
- **Data Download** : Stock data need to be downloaded from server to get the closing balance which has been uploaded through Excel.
- **Data Upload** : All the transaction done like Sale,Attendance,Tester need to be updated on server.

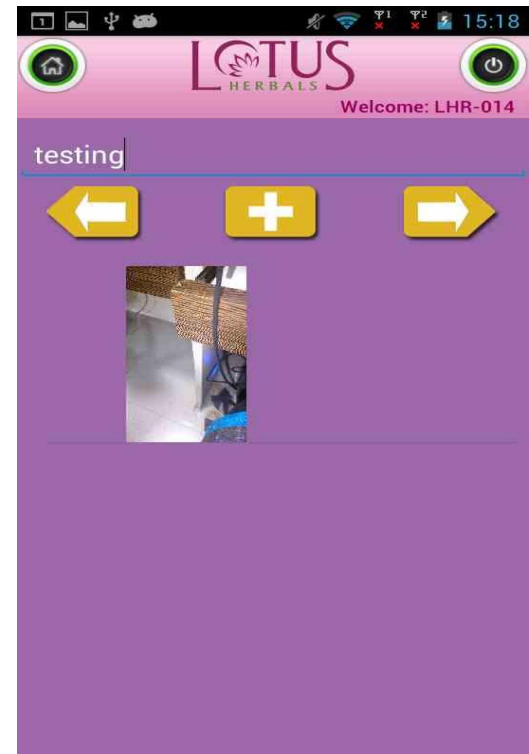

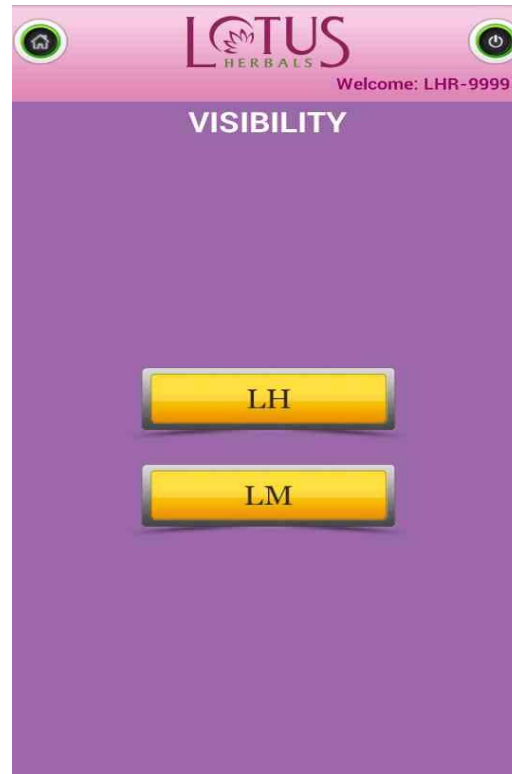

Change Password

The screenshot displays a mobile application interface for changing a password. The title bar at the top is black with the text 'ChangePassword' in white. Below it is a pink header with the 'LOTUS HERBALS' logo and a 'Welcome: LHR-262' message. The main content area is dark blue and contains three text input fields labeled 'Old Password', 'New Password', and 'Confirm Password'. At the bottom of the form is a yellow button with a floppy disk icon and the text 'Save'.

- When user want to change password
- Enter old password .
- Enter new password.
- Confirm new password.

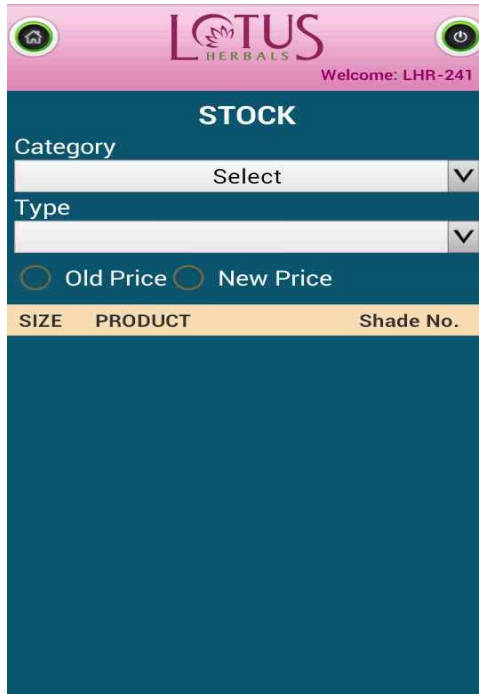

Visibility

- On the Visibility page user can enter new product details in description field (or any thing related their visibility)and can upload pictures of the product to the server and can view the uploaded images also.
